Safety Features

Saflok Electronic Key System

Every building and residence at Houndstooth is outfitted with an electronic key system that prevents key duplication, provides a record of who enters a unit and when for security, and limits maintenance access to specific times. The system also gives residents 24/7 access to the clubhouse.

Gated Community

The property has a gated entry system that operates via a remote control specific to each resident. The entire property is fenced, providing restricted access to residents and their guests.

24/7 Camera Recording

The community has cameras that record 24 hours a day, 7 days a week.

Just steps from UA Campus!
